DEF CON 16

It was once a small room filled with people and solder fumes and has since exploded in size and number of people that come through

Кто такой Хакер ?

A person who delights in having an intimate understanding of the internal workings of a system, computers and computer networks in particular.

RFC 1392, Internet Users' Glossary

Человек, получающий удовольствие от глубокого понимания внутренней работы систем, компьютеров и компьютерных сетей в частности.

И все таки, зачем?

- Не умея нападать — не сможешь защищаться
- Верификация неизвестных функций сторонних устройств
- Поиск недокументированных возможностей
- Любопытство — понять как это работает

In soviet Russia Therac-25 hacks you

Pwn the ESP32 Secure Boot

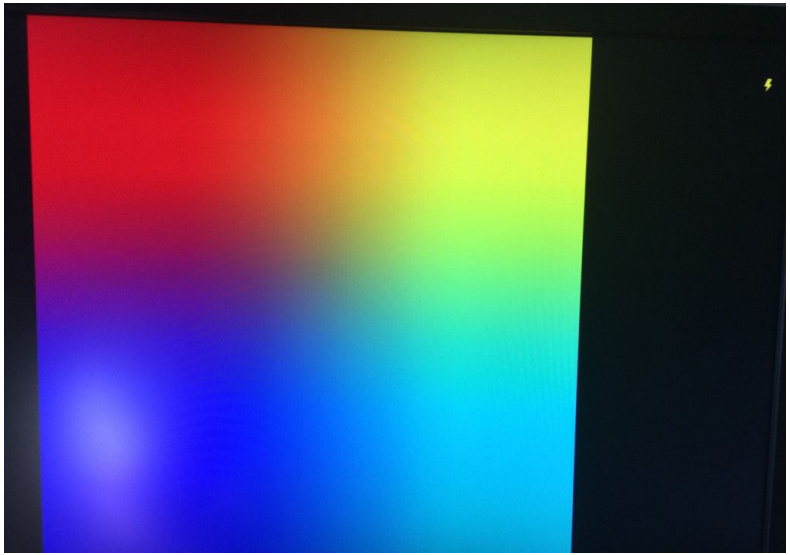
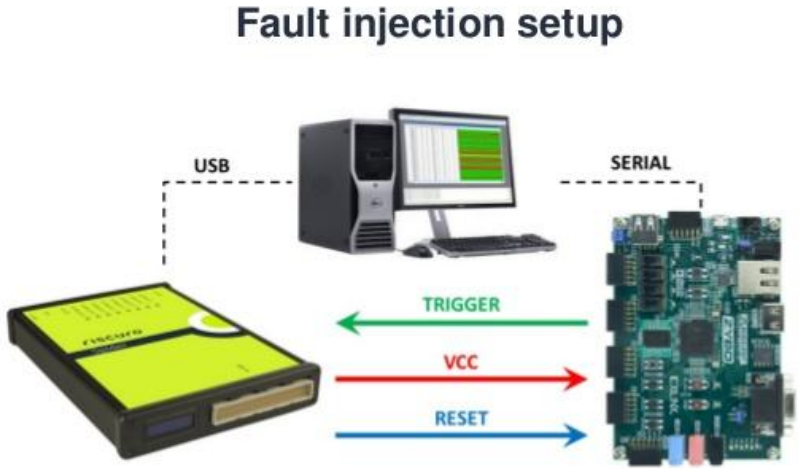
Escalating Privileges in Linux using Voltage Fault Injection





Target

- Fast and feature rich System-on-Chip (SoC)
- ARM Cortex-A9 (32-bit)
- Ubuntu 14.04 LTS (fully patched)

Apple BLEee

TL;DR: If Bluetooth is ON on your Apple device everyone nearby can understand current status of your device, get info about battery, device name, Wi-Fi status, buffer availability, OS version and even get your mobile phone number

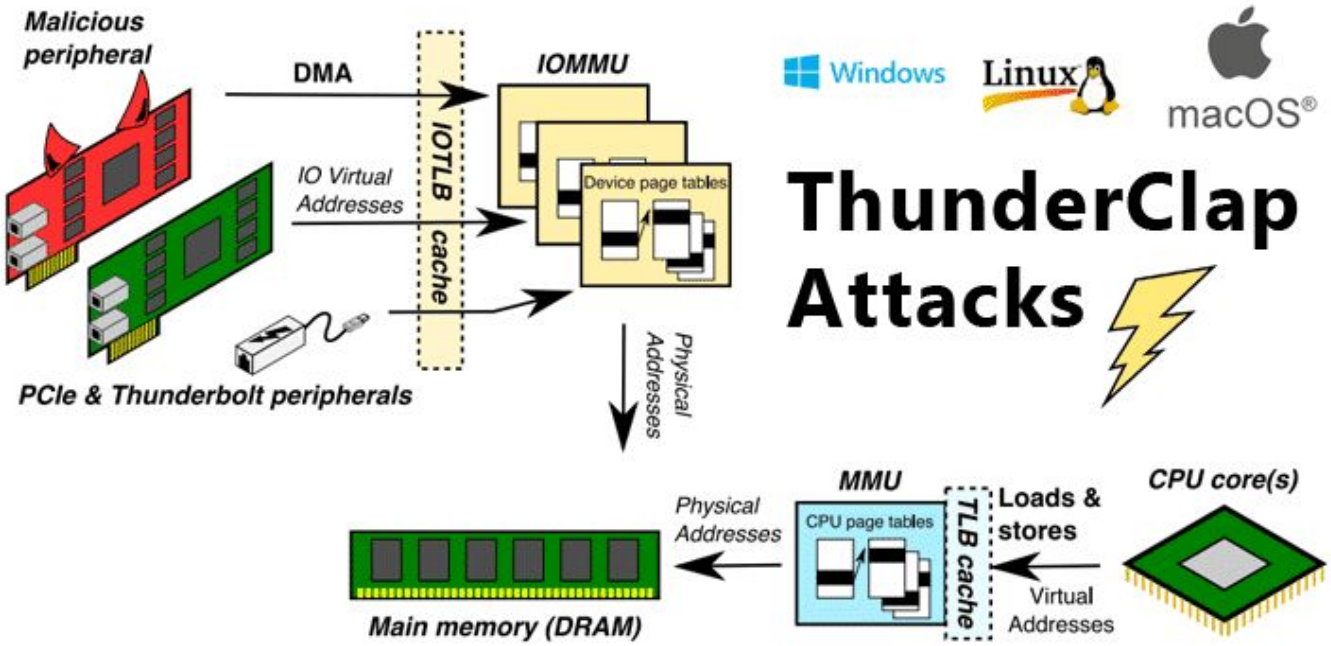
DMA attacking over USB-C and Thunderbolt 3

http://thunderclap.io/
http://blog.frizk.net/2016/10/dma-attacking-over-usb-c-and.html



Medtronic MiniMed 508 and Paradigm Series Insulin Pumps

The affected insulin pumps are designed to communicate using a wireless RF with other devices, such as blood glucose meters, glucose sensor transmitters, and CareLink USB devices. This wireless RF communication protocol does not properly implement authentication or authorization. An attacker with adjacent access to one of the affected insulin pump models can inject, replay, modify, and/or intercept data. This vulnerability could also allow attackers to change pump settings and control insulin delivery.

Critical Intel Thunderbolt Software and Firmware Updates - ThinkPad

Support

Documentation

Critical Intel Thunderbolt Software and Firmware Updates - ThinkPad

Symptom

Systems may experience any of the following symptoms:

- USB-C port not working
- Intel Thunderbolt controller not visible in the OS/Device Manager
- USB-C or Thunderbolt docking stations not visible or having connectivity problems
- HDMI output not available
- System battery not charging with a USB-C power adapter connected to the USB-C port
- Intel Thunderbolt pop-up error message
- Intel Thunderbolt safe mode error message
- BIOS Thunderbolt communication error or hang during POST

These symptoms may occur after 6 to 12 months of typical usage.

«До Второй мировай войны жизнь была проще.

После нее у нас появились системы»
